If you need information on becoming a reseller please visit your local Board of Equalization.

The "How much does a shirt cost?" Equation:

$$(Garment\$ + **Imprint\$) \times \#Garments + *Setup\$ + Film\$ + Art\$ = Total\$$$

Cost of Garment plus cost of imprinting multiplied by the number of garments then added to the Setup, Film, and Art Charges. ***Divide the total by the total number of garments to find your price per piece.
